-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang (prior art in figure 1) in view of Chubinsky .

Huang discloses in figure 1 a tri-point replacement handheld massage device comprising a main body 11, a massage section 13, the neck section and the massage section joined in a fixed manner (fig. 1) and a neck section 12. However, Huang does not disclose the neck section joined to the massage section by a dilated section, the neck section being connected to the main body by a screw thread, a projection section on the screw thread and the main body having screw openings. Chubinsky teaches in figure 1 a massage section 10 having a massage section 22, a neck section 23, a dilated section (where 22 and 23 are joined together), a thread 27 on the neck section and a projection 25. The screw thread is fastened in an opening 33 in the main body 30. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the massage section disclosed by Chubinsky could be substituted for the massage section disclosed by Huang. The threads would be used to

fasten the neck section to the main body via the threaded opening in the main body.

The dilated section would provide a tapered massaging section and a connection between the neck section and the massage section. The projection would be used to add strength to the device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kuznet discloses a boy and joint massage device. Although this reference is pertinent prior art, it was not used to reject any claims, in the first office action.
